

BIOGRAPHY

Howard S. Kim, MD, MS, is an emergency medicine physician and health services researcher at Northwestern University and an Associate Editor at JAMA Network Open. Dr. Kim's research focuses on improving the management of acute pain and reducing harms from substance use disorder. He is currently conducting an R01-funded trial of an embedded physical therapy care protocol for acute low back pain in the emergency department.

Evaluating Emergency Department Physical Therapy Interventions for Acute Low Back Pain and Dizziness/Vertigo.
